BUILDING HIGH PERFORMANCE WORK TEAMS

At the core of every successful organization is a team - a team whose members understands and trusts each other. To help build that core is LDI's Coaching and Teambuilding Skills. Coaching and Teambuilding Skills is designed to raise the individual awareness that your organization is a "Team of Teams". Not only improving the relationship of current work groups, but eliminating destructive barriers between offices, departments, labor and management, or with the contractor - who are there for the same reason - to get the job done!

Coaching and Teambuilding Skills is designed to promote and develop a wide range of critical partnership principles. Putting existing partnerships into new situations provides opportunities for growth in basic communication skills, conflict management and problem solving. Members learn the value of diversity and group dynamics as key elements of an effective partnership. Coaching and Teambuilding Skills retools your most valuable resources, people, into dynamic partnerships and powerful teams.

HOW YOU WILL BENEFIT:

- Build a culture that promotes trust, integrity and high performance
- More productive employees, offices, departments - organizations
- Unleash the power of cooperation and collaboration
- Learn activities for inspiring and energizing staff and employees
- How partnering can help to develop a productive employee

ONLY
